FALL / WINTER  
COLLECTION 2024

# HERE'S TO A WORLD AS COLOURFUL AS OUR SHEETS

ESSENZA & CO is committed to making a positive impact on the world. Our mission is to provide comfortable bedding with personality.

We dare to clash in full colour and design with respect for traditions. With our reversible covers, we invite you to explore endless possibilities and unleash your imagination.

Our high-quality products are made to last and delight the young and the young at heart alike. Join us in dreaming of a colourful world.

# DESIGNED TO LAST

# THERE IS NO SUCH THING AS SUSTAINABLE BEDDING

Producing new products will always have an impact on the world and can never be fully sustainable. That's why we've made it our mission to produce our bedding as sustainably as possible and to create products designed to last a lifetime. We're constantly looking for innovative and more sustainable materials. In doing so, we only cooperate with people, factories and companies that share our desire to improve our production together.

# WE SEE FUTURE IN RECYCLED, RECYCLABLE AND ORGANIC MATERIALS.

By using 100% GOTS-certified cotton, we're adhering to strict guidelines that protect both people and the environment throughout the entire production process. Also, combinations of more sustainable and recycled materials allow us to reduce our impact on the environment and help contribute to our mission.

We value an honest story from design to product and beyond, ensuring that every step of the process is traceable for everyone.

## 100% GOTS-CERTIFIED ORGANIC COTTON

The international GOTS certificate guarantees the use of organically grown cotton, but also that the production is carried out in an environmentally and socially responsible way. Thus, the people who grew this cotton are treated fairly and paid a living wage.

## GRS-CERTIFICATE

The Global Recycled Standard (GRS) is a voluntary product standard for tracking and verifying the content of recycled materials in a final product. The standard applies to the full supply chain and addresses traceability, environmental principles, social requirements, chemical content, and labeling. A product needs to contain at least 50% recycled materials in order to require a consumer-facing labelling.

## RECYCLED COTTON

Recycled cotton is made from old clothes, textiles and cutting waste from factories. The collected cotton is first sorted by colour and then ground into small pieces. The fibres are then taken apart to be re-spun into yarn. As recycled cotton is often already dyed and selected by colour, it doesn't always have to be dyed again. Recycled cotton is often blended with new cotton to ensure its quality.

## RECYCLED POLYESTER

Recycled polyester is made from used polyester such as PET bottles. These are made into balls from which small pellets are produced. The pellets are broken down into polymers, which, in turn, are made into polyester chips. These chips can then be melted and woven into fibres to make fabric. The addition of recycled polyester provides extra softness and strength, making the fabric last longer.

# FOR THE YOUNG, AND THE YOUNG AT HEART ALIKE

Bold, playful and colourful. The FW'24 ESSENZA & CO collection presents colourful, hand-drawn prints from our own design studio. The design team took inspiration from classic patterns, contemporary materials and fresh colour schemes. The art and nature inspired designs are abstracted and are given a modern look by enlarging prints or by placing them very subtly on the textiles.

A collection that invites you to create unexpected combinations in patterns, colours and materials. The two unique sides of each duvet cover instantly give any bedroom a new look.
